

How to have 2 coc accounts on one iphone

Continue

I believe what you are getting at fundamentally is whether you can transfer the progress of a Village from one iOS device to another, but you partially already know the answer because your brother is doing it with his iPhone and iPad. The dilemma is that you both have the same Apple ID, which could present a problem if your Village was tied to your Apple ID. Clash of Clans, like most iOS games actually ties your progress to your GameCenter account (which can be the same as your Apple ID, or can be different). SuperCell gives details of transferring Villages between devices in a FAQ article here. Based on what you've described, I don't think it is likely that both you and your brother have the same Gamecenter account. You can verify this by opening Settings->Gamecenter on your device and his device and check to see that the accounts that are logged in are not the same. If they were, you'd most likely be playing the same Village across your past 3 devices. Either way, if you want to share a device without conflicts, you'll need unique Gamecenter accounts. On a given device, when you log out of one account and log into the other you should load the other account's Village. As an aside, Apple doesn't exactly make it easy to switch back and forth constantly between GameCenter accounts. If what you are seeking is just a one time switch to be sure you aren't overwriting each others villages, linking to separate GC accounts will solve your problem. If you are trying to use one device with two villages, you may find that the constant GC account switching is more trouble than it is worth (given that you already have 2-3 other devices in play in this scenario). When you've switched from one device to another, simply fire up Clash of Clans on your new phone, tap settings and log in to your Supercell ID. You'll enter your email address, get a new six-digit code from Supercell and enter that on your phone. Your village will be restored in all its splendor.How do I connect my old clash of clans account to my Iphone?In your android phone open clash of clan.Go to setting ->link a device->this is the old device.Get a code for linking."link android if not done so till date before doing step 2.Now open clash of clans in your iphone within 2 minutes.Go to settings->link a device->this is new device .How do I recover my clash of clans account from Game Center?If you did, please try these steps:Delete Clash of Clans from your device .Log out from Facebook and Game Center from your device.Restart your device .Log in to your previous Game Center account (which you used when you played your village on old device or pre-restore).Re-install Clash of Clans from App Store.Pssst: How do I merge unallocated space to C drive in Windows 10?How do I transfer clash of clans to new Iphone?Open Clash of Clans on both your devices and follow these steps:Open the in-game settings window on both devices.Press the button that fits your current device.Select which type of device you want to link your village TO. ...Use the device code provided on your OLD DEVICE and enter it on your NEW DEVICE.How do I recover my locked clash of clans account?The unlock code pops up when an account has been locked due to an ownership dispute. You will need to contact Make sure you include your village name and clan. If the village had in the past been transferred to you it is now likely being reclaimed by the original owner.Can I give my clash of clans account to someone else?Donating your account to someone else is not allowed by the Clash of Clans Terms of Service, which you have agreed to upon installing the game, registering an account or playing the game or using their services in any other way.How do I get my old clash of clans account on my new phone without my old phone?For Android: Login to Google Play services with the same old ID. Done. Enjoy. Contact supercell to restore your account on your new device....Yes, you can.Open the settings in the game.Add your Supercell ID – create a new one with your new Google account.Find the OTP in your mail, type it in, and you're done.Psssst: How can I recover my administrator password without password?Can I get my CoC account back?Originally Answered: Can I have my clash of clans account back? You can get your coc account back if you have signed in it with one of your google play games accounts. Simply sign in the game with your account and get your village back!Can I get free CoC account?In two ways, you can get a free clash of clans premium account. For users such as no one clash of Clans premium user, you will need a list of names and passwords, if you want to get a tribulation of clans premium account without an account. So you won't need an account.How do I get the unlock code for clash of clans?Send them an email and ask them to send you the code again. I can't guarantee that they will but worth a try. You should not have exited out of your game after you give them the go to lock your account because they send you the code within 2 minutes.How do I get my old clash of clans back?Follow these steps:Open the Clash of Clans application.Go to In Game Settings.Make sure you are connected to your Google+ account, so your old village will get linked to it.Press Help and Support.Press Report an Issue.Press Other Problem.How do I make a second clash of clans account on iPhone 2020?All you need to do is to get the app and open it. Tap the "+" icon, find COC and add it. Now open Clash of Clans that you just added to Parallel Space, go to game "Settings" and then sign in the second account that you wish to load. You now have 2 COC accounts running simultaneously.How do I get my old clash of clans account on my new phone?AndroidOpen the Clash of Clans application.Go to Game Settings.Connect to a Google+ account so you can link your old village.Find the Help and Support tab in the Game Settings menu.Select Report an Issue.Select Other Problem.How do I get an unlock code for supercell?Send them an email and ask them to send you the code again. I can't guarantee that they will but worth a try. You should not have exited out of your game after you give them the go to lock your account because they send you the code within 2 minutes.How do I unlock my supercell ID?It sounds like Supercell has put the account into recovery and removed access for two days while the owner proves it is their base. They will send a code to unlock it to that person. Since you don't know why it is locked it sounds like you did not ask SC to recover the account.You can contact SUPERCELL by two ways. Either by mailing them or through Clash of Clans in-game support. But I recommend using in-game support. You can mail them in using this email and tell your problem to them. No matter your reason for the upgrade, you must not miss anything behind when you switch from Android to iPhone. While there are several tools and solutions to transfer your files, media, messages, and other stuff to iPhone, there are not a lot of solutions for games. So, in this guide, you will learn how to transfer the Clash of Clans game from Android to iPhone. Part 1. Can You Transfer Clash of Clans from Android to iPhone? When switching from Android to iPhone, many people are concerned about transferring their games and all the progress to iPhone. The same goes true for Clash of Clans players because they have spent hours achieving all the progress in the game. If you are also looking for the possibility of transferring your game with all the progress from your Android to your iPhone, then the answer is yes. There are different solutions with professes and tools that you can try. Here we will discuss the best ones you can try for a convenient experience. Part 2. How to Transfer Clash of Clans from Android to iPhone with Supercell ID Creating a Supercell ID is one of the best ways you can use it to transfer the Clash of Clans game from one device to another. The best part is that you get to keep all your progress, including your village, in the game. On top of that, the process is very simple, and you do not need to go through a complex process. There are a few simple steps to follow but be careful to follow them correctly. Steps Open the game on your device and tap on the settings button. Now tap on the disconnected button (the red one) that is present next to Supercell ID. Now you will need to tap on the register button and then go through the verification process with your email. You will get a verification code (6-digits) on the same email you need to insert here and verify that it is your account. With the verification process complete, your Supercell ID will be created, automatically saving your COC progress for the future. Install the Clash of Clans game on your new device and sign in with the same Supercell ID. Verify by providing the verification code that you will get on your email. The game will automatically synchronize all of your progress, including your village. So, whenever you want to transfer from one device to another, make sure that you have your Supercell ID connected to the game. It is also necessary to have your village saved to your ID before you switch if you want to transfer everything. Bonus: How to Get Clash of Clans Account Back Without Old Phone? If you do not have your old phone and want to get your COC account back, you still have a few chances. Chances are that you connected your amount with Facebook or Google; if that is the case, you can easily transfer your game account from one device to another. Install COC on a new device. Try signing in with Facebook or Google account. However, if you hadn't connected any of these accounts with the game in the first place, then the chances of getting your account back are very less without the old account. Conclusion If you are switching from Android to iPhone, there is no reason to leave your game progress behind and start from scrap again. Transferring Clash of Clans to a new phone is not only possible, but it is also extremely easy. With the methods we were discussing here, we hope that the process will be very convenient for you to go through.
